

```

1 ./prp/prp ./autogenerated/fond_stripedtower_d.pddl
./autogenerated/fond_stripedtower_p.pddl --dump-policy 2 --optimize-final-
policy 1
2
3 python2 ./prp-scripts/translate_policy.py >
fond_stripedtower_human_policy.out
4
5 ./prp/prp ./autogenerated/fond_blocks_clear_d.pddl
./autogenerated/fond_blocks_clear_p.pddl --dump-policy 2 --optimize-final-
policy 1
6
7 python2 ./prp-scripts/translate_policy.py >
fond_blocks_clear_human_policy.out
8

```

使用PRP可直接求解生成的autogenerated文件夹下FOND抽象文件，具体命令是：

```

1 ./prp/prp ./autogenerated/fond_reversell_d.pddl
./autogenerated/fond_reversell_p.pddl --dump-policy 2 --optimize-final-
policy 1
2
3 python2 ./prp-scripts/translate_policy.py > fond_reversell_human_policy.out

```

Demos for generation algorithm:
